

SANIDERM TATTOO AFTERCARE

- ✓ For maximum comfort, ensure skin is in a neutral position when applying Saniderm.
- ✓ When applying to elbows and knees, the joint should be in a neutral position — neither straight nor completely bent.
- ✓ Peeling Saniderm off of hair is unpleasant. Shave the entire area, plus 1 inch all the way around the site of the tattoo.
- ✓ When cutting the bandage for application, rounded corners provide the best adhesion.
- ✓ Large Tattoos: When using multiple Saniderm bandages, overlap the bandages by 1/2 inch.
- ✓ Glycerin soap/Green soap: Rinse thoroughly. Soap residue affects adhesion, will cause binding and skin irritation.
- ✓ Avoid loofahs or scratchy wash cloths.
- ✓ For more information on Saniderm, visit: <https://saniderm.com/>
